IDENTIFIERS	*New Jersey High School Proficiency Test

ABSTRACT

Ninth grade results from the April 1989 administration of the New Jersey High School Proficiency Test (HSPT) are reported. Passing the HSPT, which consists of reading, writing, and mathematics sections, is a high school graduation requirement in New Jersey. In 1989, the HSPT was administered to 67,099 ninth, 6,352 10th, 3,018 11th, and 762 12th graders. This report includes a series of tables summarizing grade 9 test results statewide for all three test sections. Comparisons of student performance include percent passing, mean score, and score distribution categories. In addition, tables are included that compare student performance for District Factor Group (DFG), 56 urban districts, and Regional Curriculum Services Unit regions. The DFG is an index of the socioeconomic status of a district. Finally, the report contains district-by-district and school-by-school results grouped by DFG. Results for each subject are compared to student performance in 1988 and to the first year the test section was scaled (base year). The HSPT scores in this report exclude special education students, limited English-proficient students, and students whose answer folders were voided. Of the 65,787 students taking the reading section, 64,332 (97.8%) passed it. Of the 66,388 students taking the mathematics section, 58,348 (87.9%) passed it. These figures represent increases over past years for all three sections. Of the 65,734 students taking the writing section, 61,566 (93.7%) passed it. Statewide, the number of ninth graders who passed all three sections of the test in 1989 was 56,253 (83.8%); in 1988, the number was 53,204 (76.7%). (TJH)

Spring 1989 High School Proficiency Test Results - Grade 9
Executive Summary

The New Jersey High School Proficiency Test (HSPT) consists of three sections--reading, writing, and mathematics--and must be passed as one of the requirements for a high school diploma. If a student does not pass one or more sections, he or she will receive additional instruction and will be retested on that section or sections. The passing scores for the HSPT are reading - 75, mathematics - 61, writing - 77.

The HSPT was administered on April 11, 12, and 13, 1989 to *67,099 students in grade nine, *6,352 students in grade ten, *3,018 students in grade eleven, and *762 students in grade twelve. The students in grades ten, eleven, and twelve who were tested included those who previously did not pass one or more sections of the test as well as newly-enrolled tenth, eleventh, and twelfth graders who did not attend a New Jersey public school as ninth, tenth, or eleventh graders.

This report includes a series of tables summarizing grade nine test results statewide for reading, mathematics, and writing. (The performance of students in grades ten, eleven, and twelve is presented in separate reports.) Comparisons of student performance include percent passing, mean score, and score distribution categories. Because the passing scores differ for reading, mathematics, and writing, the score distributions described in this report differ accordingly.

In addition, tables are included that compare student performance for the following categories: District Factor Group (DFG), 56 Urban Districts, and Regional Curriculum Services Unit regions (RCSUs). An explanation of District Factor Groups is included at the end of this report. Finally, the report contains district-by-district and school-by-school results grouped by DFG. The HSPT scores in this report exclude special education students, limited English-proficient students, and students whose answer folders were voided.

Results for each subject are compared to student performance in 1988 and to the first year the test section was scaled (base year). For reading and mathematics, the base year is 1984; for writing, it is 1985. The writing results are compared to 1985 instead of 1984 due to a change in the method for scoring the essay portion of the test from the Holistic Method in 1984 to the Registered Holistic Method used in 1985 and subsequent years. It would be inappropriate to compare test results when different methods of scoring essays were used.

The data in this report are based on information collected from students' answer folders. Subsequent to the distribution of test results to districts in June, there is a procedure for amending student identification information to correct errors that were made when students' answer folders were completed. Timelines did not allow any such approved amendments to the data to be included in this report.

*This figure represents the total number of students to whom at least one section (reading, mathematics, or writing) of the HSPT was administered, excluding those classified as special education or limited English-proficient.

Reading

Of the 65,787 students tested, 64,332, or 97.8 percent, passed the reading section of the HSPT. This represents an increase of 4.4 percentage points compared to the 1988 percent passing of 93.4. The mean score for 1989 was 94.3, an increase of 3.7 compared to the 1988 mean of 90.6, and an increase of 17.0 compared to the 1984 mean of 77.3.

On the 1989 reading section, 88.5 percent of the students scored between 89 and 100, compared to 71.8 percent in 1988, and 32.3 percent in 1984, increases of 16.7 and 56.2 percentage points, respectively. These increases were combined with a decline in the percent of students scoring 49 or below. In 1984, 7.8 percent of the students scored between 0 and 49; in 1988, that figure dropped to 0.2 percent; and in 1989, to 0.1 percent.

Of the 19,728 students tested in the 56 Urban Districts, 94.2 percent passed the reading section; in 1988 the percent of students who passed was 84.4, a gain of 9.8 percentage points. The percent of students in the 56 Urban Districts who passed the reading section was 5.1 percentage points lower than All Other Districts and 3.6 percentage points lower than the statewide percentage. A comparison of mean scores for the 56 Urban Districts indicates an increase of 5.2 from 1988 to 1989 and an increase of 22.6 from the 1984 base year to 1989.

The score distributions show that in the 56 Urban Districts 74.4 percent of the students scored 89 or above in 1989 compared to 50.9 in 1988, an increase of 23.5 percentage points. In 1984, 12.4 percent of the students scored 89 or above; this represents an increase of 62.0 percentage points compared to this year. At the lower end of the scale, 0.2 percent of the students scored 49 or below in 1989, compared to 0.6 in 1988 and to 22.0 in 1984. Compared to 1989, this represents decreases of 0.4 and 21.8 percentage points, respectively.

In All Other Districts, 94.5 percent scored 89 or above in 1989, compared to 81.2 in 1988 and to 37.7 in 1984. This represents increases of 13.3 from 1988 to 1989, and 56.8 percentage points from 1984 to 1989. Between 1984 and 1989, the percent of students in All Other Districts who scored 49 or below declined. In 1989, it was less than 0.1 percent; in 1988 it was also less than 0.1; and in 1984, 4.0.

Mathematics

The mathematics section of the HSPT was administered to 66,388 students. Of this total, 58,348 or 87.9 percent passed, an increase of 6.1 percentage points compared to the 1988 percent passing of 81.8. The mean score in 1989 was 80.5, an increase of 3.5 compared to the 1988 mean of 77.0 and an increase of 17.9 compared to the 1984 mean of 62.6.

The score distributions show that 59.5 percent of the students tested scored 81 or above, compared to 50.9 in 1988 and 22.5 in 1984, increases of 8.6 and 37.0 percentage points, respectively. These increases were accompanied by a decline in the percent of students scoring 40 or below. In 1984, 15.0 percent scored between 0 and 40; in 1988 that figure had declined to 3.0; in 1989, it was 1.9, a decrease since 1984 of 13.1 percentage points.

A total of 20,097 students in the 56 Urban Districts was tested in mathematics. The passing rate was 75.0 percent compared to a passing rate in 1988 of 66.0, for an increase of 9.0 percentage points. While this increase was higher than the 4.4 percentage point increase shown by All Other Districts between 1988 and 1989, the percent of students in the 56 Urban Districts who passed the mathematics section is 18.5 percentage points lower than All Other Districts and 12.9 percentage points lower than the statewide average. A comparison of mean scores for the 56 Urban Districts indicates an increase of 4.1 from 1988 to 1989 and an increase from the 1984 base year to 1989 of 20.7.

The score distributions show that for the 56 Urban Districts, 39.3 percent of the students scored 81 or above in 1989, compared to 31.1 in 1988, an increase of 8.2 percentage points. In 1984, 9.4 percent of students in the 56 Urban Districts scored 81 or above; the 1989 figure of 39.3 percent represents an increase of 29.9 percentage points. The percent of students in the 56 Urban Districts who scored 40 or below was 4.8 in 1989, 6.9 in 1988, and 30.3 in 1984, for a decrease of 25.5 percentage points from 1984 to 1989.

In All Other Districts, 68.3 percent of the students scored 81 or above in 1989 compared to 60.0 percent in 1988 and 28.3 percent in 1984, increases of 8.3 and 40.0 percentage points, respectively. At the lower end of the scale, in 1989, 0.6 percent of the students scored 40 or below. In 1988, the percentage was 1.2, and in 1984, 8.2, for a decrease of 7.6 percentage points from 1984 to 1989.

Writing

Statewide, 65,734 students were tested on the writing section of the HSPT. Of this total 61,566, or 93.7 percent, passed the writing section, an increase of 3.0 percentage points compared to 1988. The mean score in 1989 was 87.4, an increase of 1.5 compared to the 1988 mean of 85.9, and an increase of 7.4 compared to the 1985 mean of 80.0.

The score distributions show that since 1985 there was a continued shift in the test scores toward the upper end of the score scale. In 1985, 17.4 percent of the students scored between 89 and 100; in 1988, the percent was 33.9; and this year it was 41.3, increases of 23.9 and 7.4 percentage points, respectively. A similar shift was seen at the lower end of the scale. In 1989, 0.8 percent of the students scored 64 or below. In 1988, the percent was 1.1 and in 1985, 6.1, for a decrease of 0.3 percentage points from 1988 to 1989 and a decrease of 5.3 percentage points from 1985 to 1989.

In the 56 Urban Districts, 85.4 percent of the 19,652 students tested passed the writing section of the HSPT. This represents an increase of 4.3 percentage points compared to the 81.1 percent who passed the writing section in 1988. In All Other Districts 97.2 percent of the students passed the writing section in 1989. This figure is 11.8 percentage points higher than the passing rate for students in the 56 Urban Districts. The percent of students in the 56 Urban Districts who passed the writing section is 8.3 points lower than the state percentage. A comparison of mean scores for the 56 Urban Districts indicates an increase of 1.3 from 1988 to 1989 and an increase of 8.8 from the 1985 base year to 1989.

The score distributions show that in the 56 Urban Districts, 24.8 percent of the students scored 89 or above in 1989, compared to 20.6 in 1988, and 7.8 in 1985, increases of 4.2 and 17.0 percentage points, respectively. The percent of students who scored 64 or below was 2.0 in 1989, 2.7 in 1988, and 14.0 in 1985, representing a decline since 1985 of 12.0 percentage points.

In All Other Districts, the percent of students who scored 89 or above in 1989 was 48.3; in 1988, it was 39.9; and in 1985, 21.7. In 1989, this represented an increase of 8.4 percentage points compared to 1988, and an increase of 26.6 percentage points compared to 1985. The percent of students who scored 64 or below in 1989 was 0.2; in 1988, it was 0.4; and in 1985, it was 2.6, for a decrease from 1988 to 1989 of 0.2 percentage points, and a decrease from 1985 to 1989 of 2.4 percentage points.

On the essay portion of the writing section, the statewide mean score for 1989 was 8.6, compared to a mean score in 1988 of 8.4 and a mean in 1985 of 7.6, representing an increase of 1.0 from 1985 to 1989.

The score distributions indicate that in 1989, 85.8 percent of the students had essay scores between 8 and 12; in 1988, this figure was 82.4 percent, for an increase of 3.4 percentage points. In 1985, 58.0 percent of the students had scores between 8 and 12; compared to 1989, this represents an increase of 27.8 percentage points.

In the 56 Urban Districts, the mean essay score went from 6.8 in 1985 to 7.8 in 1988, and to 7.9 in 1989. This represents an increase of 1.1 during the period 1985-89. The score distributions indicate that in 1989, 74.3 percent of the students had essay scores between 8 and 12; in 1988, the percent was 71.0; and in 1985, it was 39.9. This represents an increase of 3.3 percentage points compared to 1988 and an increase of 34.4 percentage points compared to the 1985 base year.

In All Other Districts, the 1989 essay mean was 8.9 compared to 8.6 in 1988 and 8.0 in 1985. In 1989, 90.8 percent of the students had essay scores between 8 and 12; in 1988, that figure was 87.7 percent; and in 1985, it was 66.0 percent. This represents an increase of 3.1 percentage points from 1988 to 1989, and an increase of 24.8 percentage points from 1985 to 1989.

On the multiple-choice portion of the writing section, the mean score this year was 90.0, compared to 87.7 in 1988 and 78.0 in 1985, increases of 2.3 and 12.0, respectively. The score distributions indicate that in 1989, 87.2 percent of the students scored 81 or above, while in 1988, this figure was 80.8, an increase of 6.4 percentage points. In 1985, 48.0 percent of the students scored 81 or above; compared to 1989, this was an increase of 39.2 percentage points.

In the 56 Urban Districts, the mean score in 1989 was 85.8, compared to 83.4 in 1988 and 71.3 in 1985, increases of 2.4 and 14.5, respectively. The score distributions show that in 1989, 73.7 percent of the students scored 81 or above; in 1988, it was 65.4 percent; in 1985, 30.0 percent. This represents an increase of 8.3 percentage points from 1988 to 1989 and 43.7 percentage points from 1985 to 1989.

In All Other Districts, the mean score increased from 80.9 in 1985 to 89.6 in 1988, and to 91.7 in 1989. This represents an increase from 1988 to 1989 of 2.1 and an increase from 1985 to 1989 of 10.8. The percent of students scoring 81 or above was 92.9 percent in 1989, 87.7 percent in 1988, and 56.0 percent in 1985. This represents an increase of 5.2 percentage points from 1988 to 1989 and an increase of 36.9 percentage points from 1985 to 1989.

Summary

The percent passing for 1989 was 97.8 percent in reading, 87.9 percent in mathematics, and 93.7 percent in writing. The number of students who did not pass each section of the test is 1,455 in reading, 8,040 in mathematics, and 4,168 in writing. Statewide, the number of grade nine students who passed all three sections of the test this year was 56,253 (83.8 percent); in 1988, the number was 53,204 (76.7 percent). Compared to last year, this represents an increase of 7.1 percentage points.

In addition to increases in the percent of students who passed all three sections of the test, this year saw increases in the percent of students who passed each section compared to last year. The greatest increase was in mathematics. Compared to last year, there was an increase of 6.1 percentage points in the percent of students who passed the mathematics section. The increase in reading was 4.4 percentage points and in writing the increase was 3.0 percentage points. In the 56 Urban Districts, the percent of students who passed each section of the test continued to be lower than All Other Districts; however, the rate of improvement for the 56 Urban Districts increased in each of the last three years.

In addition to increases in percent of students who passed each section of the test, there continued to be a shift in distribution of test scores from the lower end to the higher end of the scale. This was indicated for each section of the test in the 56 Urban Districts and for All Other Districts. Accompanying this increase at the higher end of the scale was a decline in the percent of students who scored in the lowest categories of distribution.

GS OF THE MSPT

COMMUNITY TYPES AND DISTRICT FACTOR GROUPS

A. Community Types

1 — Urban Center (UC): densely populated with extensive development.
2 — Urban-Suburban (US): near an urban center but not as highly developed, with larger residential areas.
4 — Suburban (S): predominantly single-family residential within a short distance of an urban area.
5 — Suburban-Rural (SR): rapidly developing area, but still large tracts of open land available for development.
6 — Rural (R): scattered small communities and isolated single-family dwellings.
7 — Rural Center (RC): high-density core area with surrounding rural municipalities.
8 — Rural Center Rural (RCR): small developed core area surrounded by rural areas.
9 — Vocational (V): primary emphasis on vocational training under a separate educational jurisdiction.
0 — Regional District (RD): an educational jurisdiction established to service several surrounding communities.

B. District Factor Groups

The District Factor Group (DFG) is an indicator of the socioeconomic status of citizens in each district and has been useful for the comparative reporting of test results from the statewide testing programs. The measure was first developed in 1974 using demographic variables from the 1970 United States Census. Since that time, however, the socioeconomic status of some districts may have changed considerably. Therefore, an updating of the DFG designations was needed.

The DFG's have been updated using seven socioeconomic variables from the 1980 United States Census. These are:

(1) Educational level

1 = elementary (0-8 years) through high school (1-3 years)
2 = high school (4 years)
3 = college (1-3 years)
4 = college (4 years)
5 = college (5+ years)

(2) Occupational status

1 = laborers
2 = service workers (except private and protective)
3 = farm workers

4 = operatives and kindred workers
5 = protective service workers
6 = sales workers
7 = clerical and kindred workers
8 = craftsmen, foremen, and kindred workers
9 = quasi-professionals
10 = managers, officials, and proprietors
11 = old and new professionals

(3) Density

number of persons per household

(4) Urbanization

percent of district considered urban

(5) Income

median family income

(6) Unemployment

percent of those in the work force who received some unemployment compensation in 1979

(7) Poverty

percent of residents below the poverty level in 1979

The variables were combined using a statistical technique called principal component analysis, which resulted in a single measure of socioeconomic status for each district. Districts were then ranked according to their value on this measure and divided into 10 equally-sized groups. Hence, DFGs range from A (lowest socioeconomic districts) to J (highest socioeconomic districts). In addition, special service districts are not included and all vocational districts are designated DFG "V".
